

Fire Safety

If there is a fire

the smoke detector will
go off.

It may be loud. It's
okay to cover your ears.

Get low to stay safe
from the smoke.

Find an exit.

Before opening, feel the door with the back of your hand.

If hot, leave it closed!

A window is another way
to get out safely.

Get out and stay out!

911

Call 911 once you are
outside.

Firefighters come to
put out the fire.
